

Model HFD-08RO/Supreme II S Manual

Instructions for Model HFD-08RO/Supreme II S Hitec 8Channel Dual Conversion Receiver

Thank you for purchasing the Hitec HFD-08RO/Supreme II S dual conversion FM receiver. The HFD-08RO/Supreme II S will allow you to enjoy your flight with extreme confidence and satisfaction. This HFD-08RO/Supreme II S utilizes the latest Surface Mount Technology (SMT) to reduce the size and weight. Based on Hitec's latest technology and years of experience building high performance receivers, the HFD-08RO/Supreme II S will provide you with reliable, robust, full range performance for years to come.

Features and Specifications

- 8 channel dual conversion FM operation.
- Gold plated pins.
- Ch. 1~8.
- Auto Gain Control
- Auto Shift (For 72MHz/Supreme II S)
- Uses Hitec dual conversion crystals.
- Weight : 1.00 oz/(28.5g)
- Size : 2.00x1.26x0.79 in. (51x32x20 mm)
- Input Voltage : 4.3~6.0V

Installation

1. Always turn on the transmitter before turning on the power to the receiver.
 2. Always perform a range check prior to the first flight of the day.
- Check the operation status at least 75 feet away from the receiver with the transmitter antenna fully collapsed.

Changing the Crystal

Your Hitec receiver is "center tuned" and will accept any Hitec dual conversion crystal without re-tuning.

*Auto Shift Selection (For 72MHz/Supreme II S)

If you need to match Shift type (Negative or Positive) between Tx and Supreme II S, just by turning OFF and ON of Supreme II S, you can easily synchronize the Shift type. (Keep the TX power ON during Auto Shift Selection)
