## HSG-8315BH

### High Voltage, Ultra-Fast Helicopter Tail Rotor Servo

Our new supersonic helicopter servo is fast and furious fun! Built with ultra-speed in mind, the HSG-8315BH has a high-performance coreless motor, robust Karbonite and aluminum hybrid gear train and high resolution, low dead band circuitry. It is the perfect tail rotor servo for 500+ size electric and 50-size and up gas pilots whose maneuvers and aerobatics demand the utmost precision and acceleration. Rated at 7.4 volts for 2S LiPo operation, the HSG-8315BH rivals anything like it on the market. Throw in its 25-tooth standard spline and dual ball bearings and you will never look at another servo again.

**Fly hard, fly Hitec!**
